## Polytex®+

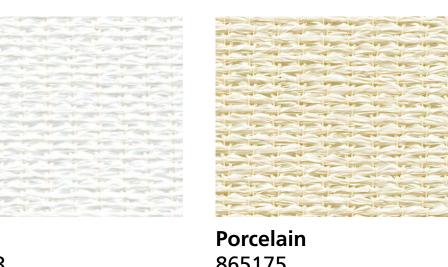

Roll Width: 150 inches • Weight: 7oz/yard² • Put Up: 33 yards, center folded

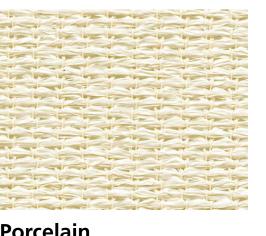

Polytex®+ is made of High-Density Polyethylene (HDPE) fire retardant shade fabric, manufactured with monofilament and tape yarns. New and improved pigmentation allows for extended color life. Polytex+ is heat-set reducing curling and shrinkage offering improved dimensional stability. Designed for architectural shade sails and outdoor shade structures like canopies and patio shade sails where sun protection is needed. It offers a high-strength-to-weight ratio, mildew resistance, and 12-year warranty against UV degradation. This lightweight shade cloth is lead and phthalate free.

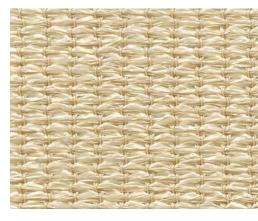

FR Standards Met: NFPA 701 TM 2

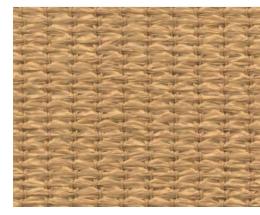

Colors are representative only. Small variations in shade should be anticipated and are with commercial tolerances.

### Comtex®+

Roll Width: 150 inches • Weight: 10oz/yard² • Put Up: 33 yards, center folded

Comtex®+ is a knitted High-Density Polyethylene (HDPE) fire retardant shade fabric. Comtex+ is heat-set allowing for less curling and shrinkage, offering improved dimensional stability. Designed for medium-to-large architectural shade sails, tension membrane structures and commercial shade structures. This versatile fabric performs excellency for both commercial and residential applications. New and improved pigmentation allows for extended color life. It delivers lasting protection from the sun's rays with a 12-year warranty against UV degradation. This shade cloth is lead and phthalate free.

### Architec 400®

Roll Width: 150 inches • Weight: 12 oz/yard<sup>2</sup>
Put Up: 55 yards, not folded

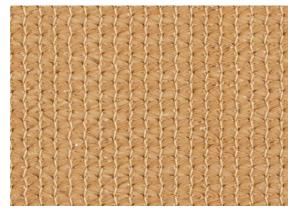

Architec 400° is a high-strength, UV-stabilized knitted shade cloth. It is designed for large, commercial tension structures and shade sails. This High-Density Polyethylene (HDPE) shade fabric incorporates the latest in ultraviolet stabilizers that provide color consistency and colorfastness. Architec 400 has a 15-year warranty against UV degradation and is lead and phthalate free.

FR Standards Met: ASTM E-84 Class 1 or A rating

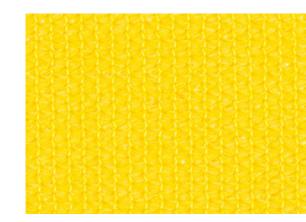

Colors are representative only. Small variations in shade should be anticipated and are with commercial tolerances.
