# YOUR PARTNER FOR OUTDOOR ARCHITECTURAL SOLUTIONS

For over 40 years, Valrose has redefined outdoor living across Florida with unmatched superior quality, technical expertise, and Florida-rated builds engineered to thrive in the Sunshine State's toughest conditions.

We don't just install structures—we craft elevated outdoor lifestyles. Every Valrose project is a seamless fusion of architectural precision, hurricane-rated resilience, and timeless design, ensuring your patio, pergola, or pool enclosure stands as a legacy of excellence for generations.

# WHY VALROSE?

- 40+ Years of Mastery — Proven leadership in Florida's outdoor construction landscape.
- Florida-Rated Engineering — Built to exceed state wind, impact, and flood codes—no compromises.
- Technical Expertise — In-house designers, structural engineers, and certified installers.
- Unrivaled Quality — Premium materials, flawless finishes, and obsessive attention to detail.
- 

Your vision. Our expertise. A lifetime outdoors.

Partner with Valrose—where Florida's best homes come to life outside

## BUILT TO OUTLAST, CRAFTED TO OUTSHINE

40 years in business isn't a milestone—it's our unfair advantage. While others outsource and compromise, Valrose controls every inch of excellence from our state-of-the-art South Florida manufacturing facility.

- 100% In-House Fabrication — Every beam, panel, and component is precision-engineered under one roof in South Florida, ensuring zero delays, zero shortcuts, and zero surprises.
- Premium-Grade Materials — Marine-grade aluminum, impact-rated glass, and proprietary powder-coat finishes selected for Florida's harshest elements—salt, sun, and storms.
- Superior End Product — Flawless welds, seamless integration, and finishes that resist fade, corrosion, and wear for decades—not years.

No middlemen. No markups. No equals.

Valrose doesn't just build outdoor structures—we manufacture legacies.

# THE DIPLOMAT BEACH AND RESORT

Valrose was selected to design, fabricate, and install a series of bespoke pergolas and cabanas for the iconic Diplomat Beach Resort in Hollywood, Florida. The project aimed to elevate the guest experience around the outdoor pool area by integrating shade structures that combine architectural, elegance, durability, and comfort.

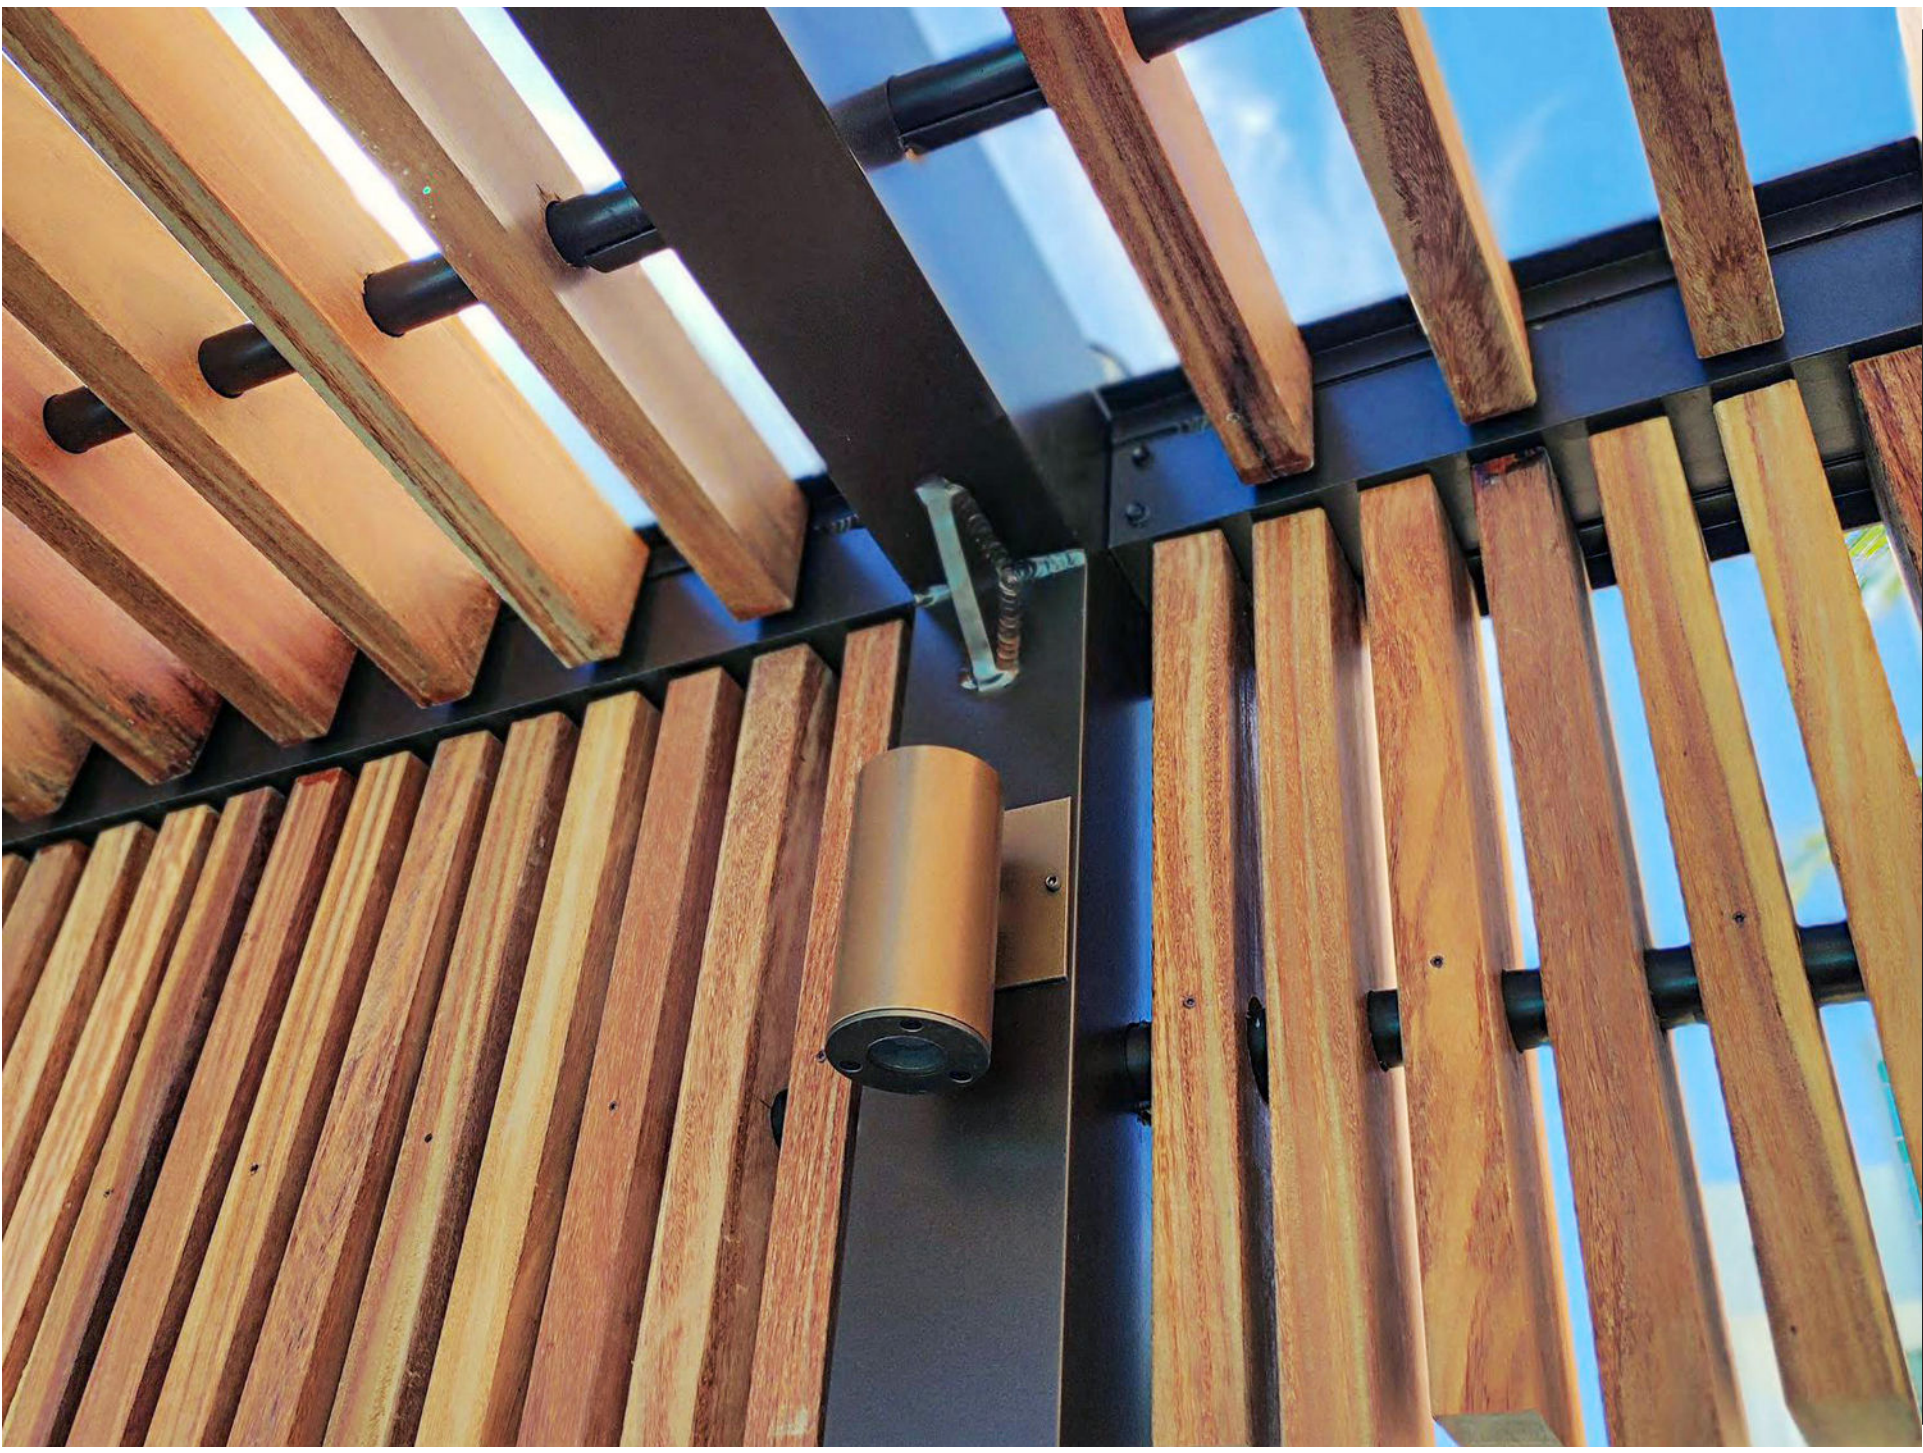

# TRUMP INTERNATIONAL BEACH RESORT

Valrose was commissioned to design and install a signature shade structure for the beach front bar and dining terrace at the prestigious Trump International Beach Resort in Sunny Isles. The goal was to create a visually striking and highly functional canopy that complements the luxury atmosphere of the property while offering year-round comfort for guests. The result is a custom wave-form tensioned structure, spanning the full length of the outdoor bar.

# THE RITZ-CARLTON SOUTH BEACH

Valrose was proud to collaborate with TheRitz-Carlton South Beach, one of Miami's most iconic luxury hotels, to design and install a set of bespoke shading systems in key guest areas. To transform the beachfront dining area into a vibrant and shaded experience, we designed and installed a series of multi-color, overlapping sail shades in bold red and yellow tones. For the elevated pool bar and lounge space, we designed a custom flat-roof pergola with clean, architectural lines and full coverage over the seating and bar area.

# THE SEAGATE GOLF CLUB

Valrose Premier Shades was commissioned to design, engineer, and install a grand architectural pergola at the prestigious Seagate Golf Club, creating a shaded, luxurious outdoor lounge and dining area for members and guests.

# TRUMP NATIONAL GOLF CLUB JUPITER

Valrose was selected to design, fabricate, and install a comprehensive system of custom awnings throughout the outdoor areas of the prestigious Trump National Golf Club in Jupiter. This project involved enhancing multiple walkways, terraces, and transition zones with permanent shading structures that blend seamlessly into the property's Mediterranean-inspired architecture.

# THE ESTATES AT ACQUALINA

Valrose was honored to partner with one of the most exclusive luxury developments in Florida—The Estates at Acqualina—to design, fabricate, and install a comprehensive suite of custom shade structures for their beachfront hotel and outdoor hospitality areas.

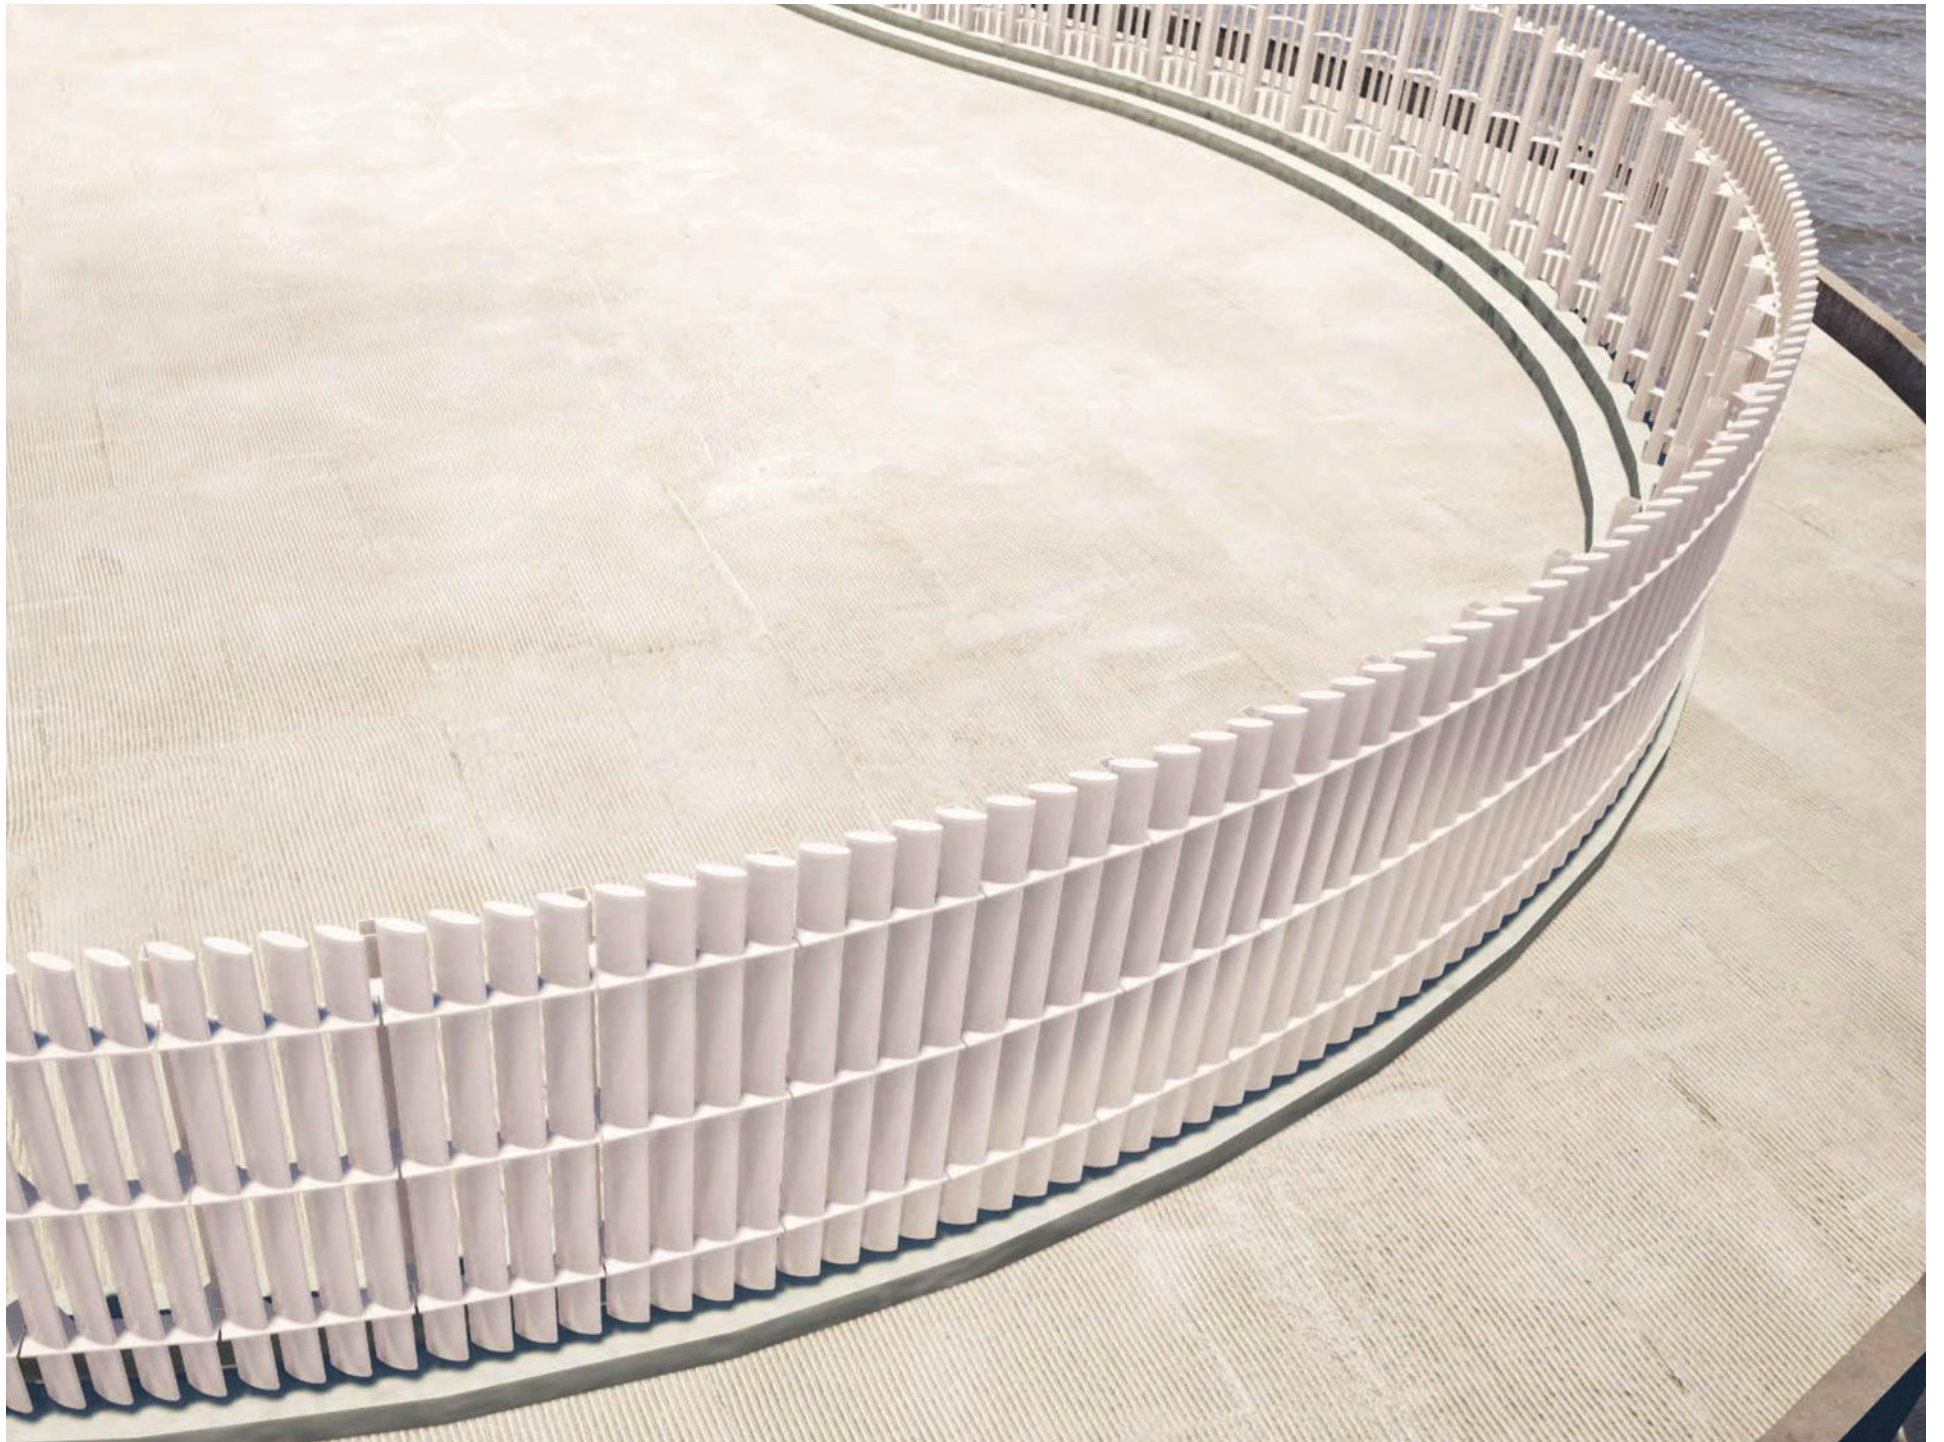

# SUNDY VILLAGE VERTICAL AIRFOILS

A custom-engineered series of aluminum airfoils installed atop the building to provide both solar shading and architectural enhancement. Designed for durability and visual impact, the system offers a sleek, modern finish that complements the building's exterior while improving energy efficiency and overall aesthetic value.
